PROJECTS

BENTOME

Project Lead

Led a local team in the development and launch of a fully online, self-sufficient Japanese lunch delivery service using Python and Django.

- Complete Stripe integration (user validation to post-transaction)
- MySQL back-end for menu design, recipe creation, ingredient tagging, user chats
- Daily menu ("du jour") by trained native Japanese chef

VOTERGAB

UI/UX Designer

Worked jointly with CA Assembly District Delegates to create an online voter community tool in MEAN stack using real data from Vote Smart API.

- Personal live feed of current state ballot measures
- User Groups/Endorsements system with quorum feature
- Real-time Socket.IO chat (global and groups)

PIXELTUNE

Independent Developer

Solely conceived/created an iOS "music camera" in Swift 3, using Google Cloud Vision image recognition to provide instant music recommendations.

- Emotion recognition for joy, sadness, sorrow, surprise
- OAuth user authentication using the Spotify SDK
- Streaming music in-app from "albums" of music and custom playlists

EXPERIENCE

DIGIZONE TECHNOLOGY CORP.

Los Angeles

Full Stack Web Developer

Jul. 2016 – Present
